

Claims 1- 11 (previously cancelled).

Claim 12 (currently amended) A carrying device for a cellular telephone comprising:

- a) an enclosure defining a volume capable of holding a plurality of articles, wherein said volume is formed by a body having front, back, side, top and bottom walls;
- b) an internal wall inside said enclosure defining two compartments wherein one compartment is capable of holding a cellular telephone and the other compartment is capable of holding other articles; and
- c) at least one light emitting source mounted on ~~an exterior surface of~~ one or more of the walls of said carrying device and operably connected to at least one receiver for actuating a light emitting source in response to a call received by said cellular telephone wherein when said cellular telephone receives a call, said receiver causes the light emitting source to light up and visually indicate, exteriorly of said carrying device, an incoming call.

Claim 13 (previously cancelled).

Claim 14 (previously added) A carrying device as in claim 12 further including a

transparent window oriented in a wall to expose the interior of said compartment capable of holding a cellular telephone, said window disposed in a different wall than the wall on which said light emitting source is mounted.

Claim 15 (previously added) A carrying device as in claim 14 wherein said light emitting source is mounted on a top wall thereof.

Claim 16 (previously added) A carrying device as in claim 15 wherein said top wall is defined by a flap for closing said bag.
